

# Subject Index to Volume 14

## A

Abdominothoracic measurements, parameter estimation, linear functional relations, R135  
Acclimatization; Acclimation: *see* specific subject and site  
Acetylcholine, eccrine sweat gland, structure and function, R203  
Acid, excretion, ammoniogenesis and, renal (dogfish), R581  
Acid-base balance  
acid excretion and, renal (dogfish), R581  
ammonia excretion and, kidney (goldfish), R590  
ionic balance and, hypercapnia (salamander), R689  
Acidification, urinary, insulin stimulation of, bladder (turtle), R69  
Acidity, luminal, stress ulcers and, R230  
Acidosis, respiratory, hypercapnia (salamander), R689  
Acupuncture, afferent fiber innervation and, R606  
Adenosine diphosphate, platelet aggregation, particle collision theory, model, R776  
Adenosine monophosphate, cyclic  
elasmobranch rectal gland (dogfish), R894  
glycogenolytic rates and, liver, exercise, R353  
Adenosine triphosphate-magnesium chloride, cellular mechanisms, shock and ischemia, R117  
Adenylate cyclase, activity, endotoxic shock and, liver, R737  
Adipocytes, metabolism, exercise and, obesity, R706  
Adipose tissue  
brown: *see* Brown fat  
photoperiodic regulation (meadow vole), R334  
Adrenal gland  
fetal, maternal blood volume and, pregnancy, R720  
responses, adrenocorticotrophic hormone, R53  
Adrenocorticotropin  
adrenal responses to, R53  
central angiotensin II receptor blockade, sodium-deprived, awake state, R881  
Adrenoceptors: *see* Receptors  
Afferent fibers, innervation, acupuncture and, R606  
Afferent nerves  
activity, noxious radiant heat effects, anesthesia, R576  
cardiac spina, widespread neural excitation from, R241  
Afferents  
chemical stimulation, sympathetic reflexes, spinal, heart, R345  
pancreatic, stimulation of, cardiovascular reflexes, R820  
spinal, stimulation of, cardiovascular reflexes, R820

visceral, upper thoracic sympathetic neuron responses, R311  
Aging  
febrile response and, R379  
heart rate response, post-cough, R18  
Airway, upper, smoke stimulation, sympathetic outflow during, R433  
Alanine, spawning migration, liver (salmon), R827  
Aldosterone, blood volume, cardiac output and, maternal, during pregnancy, R720  
Alkalosis, metabolic, ventilatory control in, R873  
Amiloride, action, sodium fluxes, skin (frog), R272  
Amino acids  
osmoregulation, brain (sheep), R853  
transport, brain, R556  
Ammonia, production and excretion, low environmental pH, renal (goldfish), R590  
Ammoniogenesis, renal, acid excretion and (dogfish), R581  
Amygdala, central nucleus of, parabrachial unit responses, R811  
Amygdaloid, stimulation, hemodynamic responses, spontaneous hypertension, R281  
Anesthesia, cardiovascular responses, noxious radiant heat, R576  
Angiotensin  
ingestive behavior, anteroventral third cerebral ventricle lesions and, R83  
sympathetic responses to, R60  
Angiotensin II  
central, receptor blockade, sodium-deprived, awake state, R881  
luteinizing hormone secretion and, brain, R805  
pressor effects, R906  
renal excretion, behavioral stress and, awake state, R259  
systemic and renal effects (turtle), R837  
tubuloglomerular feedback and, renal hemodynamic actions, R166  
Anorexia, spawning migration, liver (salmon), R827  
Antidiuretic hormone  
antagonist action, R713  
blood, cerebrospinal fluid and, R541  
blood and third ventricle cerebrospinal fluid, dehydration, thirst, and hemorrhage, R541  
receptor stimulation effects, left ventricular, awake state, R792  
Apnea, voluntary, cardiovascular functions during, R143  
Apolysynchronous, pharmacokinetic scaling, interspecies, R768  
Apoprotein, turnover, experimental, R386  
Arousal state, influences, thermoregulation (pigeon), R321  
Arrhythmia, post-cough response, age effects, R18  
Arterial system, pulse-wave propagation (diamond python), R831  
Arterioles, efferent and afferent, angioten-

sin and tubuloglomerular feedback, R166  
Atropine, hyperinsulinemia, hypothalamic obesity and, R372  
Autonomic drugs, hyperinsulinemia, hypothalamic obesity and, R372  
Autonomic nervous system, whole-body lymph flow and, R695  
Autoregulatory mechanisms, intrinsic, angiogenesis and tubuloglomerular feedback, R166  
Aversive conditioning: *see* Exercise  
Awake state  
adrenal responses, adrenocorticotrophic hormone, R53  
behavioral stress, renal excretory function during, neural control, R251  
left ventricular receptor stimulation effects, plasma vasopressin, R792  
pressor effects, vasopressin, R906  
renal excretion, angiotensin and behavioral stress, R259  
sodium-deprived, blockade of brain angiotensin II receptors, R881  
vasopressin  
blood and cerebrospinal fluid, R549  
blood and third ventricle cerebrospinal fluid, R541  
voluntary apnea, cardiovascular functions during, R143

## B

Baroreceptors: *see* Receptors  
Baroreflex: *see* Reflexes  
Behavior  
ingestive, gastric distension and short-term satiety (monkey), R174  
lateralization of function, R505  
periodic, vs. chaos, R478  
rest states, blood flow and metabolism, R110  
Bicarbonate, <sup>13</sup>C-labeled, kinetics, R190  
Bifurcation theory, mathematics for physiology, R455  
Biochemical systems, temporal self-organization in, R478  
Biology, theoretical vs. experimental, network thermodynamics, R1  
Birhythmicity, periodic behavior vs. chaos, R478  
Blockade  
ganglion, catecholamine secretion and, exercise (dogfish), R915  
receptor, central angiotensin II, sodium-deprived, awake state, R881  
Blood, constituents: *see* specific constituent  
Blood-brain barrier  
amino acid transport, competition for, R56  
drug delivery, model, R303  
Blood-cerebrospinal fluid barrier, vasopressin in, R541  
Blood flow: *see also* Circulation;  
Microcirculation  
cerebral, hyperglycemia and hypoglyc-

Blood flow (*continued*)  
 mia, fetus (lamb), R730  
 hepatic, renal glomerular filtration rate and, during diving (seal), R743  
 metabolism and, rest states, forearm, R110  
 renal, angiotensin and tubuloglomerular feedback interactions, R166  
 tail, body temperature control of, R426  
 uterine  
 endogenous hormones and, early pregnancy (sheep), R850  
 fluctuations during pregnancy (sheep), R843

Blood pressure: *see also* Pressure  
 angiotensin II effects (turtle), R837  
 arterial, diving, acute barodenvervation and (duck), R222  
 central angiotensin II receptor blockade, sodium-deprived, awake state, R881  
 heart rate response, post-cough, R18  
 mean right atrial, training effects (horse), R160  
 noxious radiant heat effects, anesthesia, R576  
 sodium chloride preference, genetic hypertension, R38

Blood volume: *see also* Volume  
 central nervous system regulation, body fluid distribution, R901  
 maternal, during pregnancy, R720

Body  
 fluid: *see* Fluid  
 mass: *see* Mass  
 weight: *see* Weight

Bombesin, satiety and, R927

Bone, metabolism, model, R664

Bradycardia, diving, acute barodenvervation (duck), R222

Bradykinin  
 cardiovascular reflexes and, pancreatic afferent stimulation, R820  
 neural excitation, cardiac spinal afferent nerves, R241

Brain  
 angiotensin II receptors, blockade of, sodium-deprived, awake state, R881  
 anteroventral third ventricle, preoptic recess lesion, renin-aldosterone system and, R901  
 asymmetry, lateralization of function, R505  
 dynamics, physical causality and, R510  
 lysine transport, atypical amino acid effects, R556  
 neurochemistry, sex differences, interhemispheric coupling coefficients and, R151  
 osmotic disturbances, control of extracellular ions (skate), R853  
 renin-angiotensin system, luteinizing hormone secretion regulation, R805  
 temperature  
 during induced fever, pregnancy, R421  
 regulation (monkey), R293  
 tissue, drug delivery, model, R303  
 volume: *see* Volume

Brown fat  
 sympathetic activity, obesity relations, R364  
 winter-acclimatized, increased  $\beta$ -adrenergic receptors in (voles), R357

Buffer nerves, stimulation, parabrachial unit response, R811

## C

Calcitonin, satiety and, R927

Calcium  
 active transport, urinary bladder and colon (toad), R91  
 adenosine monophosphate, cyclic-mediated effects, elasmobranch rectal gland (dogfish), R894  
 central injection, thermoregulatory response to (monkey), R76  
 homeostasis, models, R664

Calcium ionophore, catecholamines, platelet function and, R100

Capillaries, exchange, countercurrent, R534

Capsaicin, cardiovascular reflexes and, pancreatic afferent stimulation, R820

Captopril, renal excretory response, behavioral stress, awake state, R259

Carbohydrates  
 glucose uptake reversal and, muscle, exercise, R684  
 metabolism  
 endotoxic shock and, liver, R737  
 migration and cold (bird), R755

Carbon dioxide  
 airway receptors (opossum), R209  
 pH and ion balance (salamander), R689

Cardiac nerves, smoke-induced stimulation, reflexes, R433

Cardiac output  
 acute barodenvervation, diving responses (duck), R222  
 maternal, pregnancy, R720

Cardioacceleration, post-cough, age effects, R18

Cardiorespiratory function, training effects (horse), R160

Cardiovascular regulation  
 amygdaloid stimulation, spontaneous hypertension, R281  
 parabrachial unit responses, R811  
 pulmocutaneous baroreflex, open-loop analysis (toad), R642

Cardiovascular system  
 function, training effects (horse), R160  
 pancreatic afferents, stimulation effects on reflexes, R820  
 response, radiant heat, anesthesia, R576

Carotid body, chemoreception, efferent inhibition of, chronic hypoxia, R678

Carotid sinus nerve, stimulation, parabrachial unit responses, R811

Catecholamines  
 age-related deficits, febrile response, R379  
 carotid chemoreceptors, chronic hypoxia, R678

Locomotor activity and (hamster), R215

plasma, neonatal hyperthyroidism and stress, R95

platelet function and, R100

secretion, ganglionic blockade effects, exercise (dogfish), R915

Cathode ray tube, spinal cord, R751

Causality, physical, brain dynamics and, R510

Cell-to-cell junctions, sodium ion transport, skin (frog), R272

Cellular mechanisms, shock and ischemia, R117

Central nervous system, regulation, body

fluid distribution, R901

Central venous pressure: *see* Pressure

Cerebral ventricles  
 anteroventral third lesions, ingestive behavior and, R83

cerebrospinal fluid, vasopressin in, dehydration, thirst, and hemorrhage, R541

Cerebrospinal fluid  
 brain tissue and, drug delivery, model, R303  
 transients, hypercapnia, R701  
 vasopressin in, dehydration, thirst, and hemorrhage, cerebral ventricle, R541

Cervical sympathetic trunk, reflexes, urinary bladder afferents, R311

Chaos  
 intermittency to transitivity, neurophysiological flows, R484  
 mathematics for physiology, R455

Chemoreceptors: *see* Receptors

Chemosensory responses, peripheral and central, metabolic alkalosis and, R873

Chloride, control of, brain osmoregulation (sheep), R853

Cholecystokinin, satiety and, R927

Circadian clock, impact of, sleep, R497

Circadian rhythm: *see* Rhythm

Circadian state, influences, thermoregulation (pigeon), R321

Circulation: *see also* Blood flow; Microcirculation  
 control, multisegmental spinal sympathetic reflexes, heart, R345

Clearance, diving, liver and kidney (seal), R743

Clorgyline, locomotor activity and (hamster), R215

Cold  
 acclimatization  
 brown fat, increased  $\beta$ -adrenergic receptors in (voles), R357  
 migration and, metabolic adjustments (bird), R755

Colon, urinary bladder and, calcium transport (toad), R91

Compliance  
 intestinal, thoracic duct lymph flow, R785

intestinal, autonomic regulation, whole-body lymph flow, R695

Computer studies  
 abuse of statistics, linear models, R299  
 calcium homeostasis, R664  
 sodium ion transport, skin (frog), R272

Conductance, thermal, blood flow and, tail, R426

Converting enzymes, inhibition, angiotensin and tubuloglomerular feedback interactions, R166

Corticosteroids  
 central angiotensin II receptor blockade, sodium-deprived, awake state, R881  
 production, adrenal, R53

Corticosterone, peak, prefeeding, role of food amount, R339

Cortisol, ion transport, control of, urinary bladder (fish), R45

Cough, heart rate response, age, sex, and blood pressure effects, R18

Coupling  
 dynamical models, physiology, R467

interhemispheric coefficients, sex differences, brain neurochemistry, R151  
stimulus-secretion, elasmobranch rectal gland (dogfish), R894

**D**

Decompression, countercurrent capillary exchange, R534  
Dedrick plots, pharmacokinetic scaling, interspecies, R768  
Dehydration  
prostaglandin E<sub>2</sub>, urinary excretion of, R329  
sodium balance and, species differences (rat, rabbit, sheep), R287  
vasopressin, blood and cerebrospinal fluid, R541  
Dehydroepiandrosterone, blood volume, cardiac output and, maternal, during pregnancy, R720  
Depressor nerve stimulation  
diving (duck), R222  
parabrachial unit responses, R811  
Dextran 70, whole-body lymph flow and, R695  
Diameter spectrum, afferent fiber, acupuncture and, R606  
Dihydroalprenolol, <sup>3</sup>H-labeled, brown fat receptors, winter-acclimatized (voles), R357  
1,25-Dihydroxycholecalciferol, calcium homeostasis and, model, R664  
Dimethyloxazolidinedione, intracellular pH, temperature interactions, hepatocytes, R32  
Diving  
acute barodenervation effects (duck), R222  
metabolic adjustment to (lungfish), R651  
renal glomerular filtration rate, hepatic blood flow and (seal), R743  
voluntary apnea, cardiovascular functions during, R143  
Drinking  
anteroventral third cerebral ventricle lesions and, R83  
daily sodium intake effects, R860  
seawater, esophageal desalination of (flounder), R888  
sodium chloride preference, hypertension, R38  
thirst, vasopressin in blood and cerebrospinal fluid, R541  
Duodenum, osmoconcentration, food intake and, after hypertonic nutrient ingestion (pig), R181  
Dynamics  
models for physiology, R467  
nonlinear, neuropsychobiological flows, R484  
nonlinear and qualitative, mathematics for physiology, R455

**E**

Eccrine sweat gland: *see* Sweat gland  
Elasmobranch  
osmoregulation, brain (skate), R853  
rectal gland, calcium in adenosine monophosphate, cyclic effects (dogfish), R894  
Electrocortical activity, hyperglycemia and

hypoglycemia, fetus (lamb), R730  
Electroencephalography  
brain dynamics, physical causality and, R510  
neural excitation, cardiac spinal afferent nerves, R241

Electrolytes  
balance  
daily sodium intake effects, R860  
hypercapnia (salamander), R689  
excretion, angiotensin II effects (turtle), R837  
plasma, urinary excretion, water deprivation effects, R329  
slow and fast muscle fibers, rest and exercise, R25

Electrophysiology  
multisegmental spinal sympathetic reflexes, heart, R345  
spinal cord, R751  
sympathetic responses, angiotensin and sodium chloride, R60

Electroretinogram, visual acuity, R637  
Endocrine system, mathematical model, R473

Endotoxic shock: *see* Shock

Energy balance  
body weight regulation and, intestinal bypass surgery, R658  
reproduction and, photoperiodic regulation (meadow vole), R334

Entrainment, circadian rhythm, temperature effects (monkey), R800  
Environment: *see* Temperature, environmental

Enzymes: *see also* specific enzyme  
diving, metabolic adjustment to (lungfish), R651  
oscillatory, periodic behavior vs. chaos, R478

Epinephrine  
hyperinsulinemia, hypothalamic obesity and, R372  
neonatal hyperthyroidism, adult stress and, R95  
secretion, ganglionic blockade effects, exercise (dogfish), R915

Ergosomes, pharmacokinetic scaling, interspecies, R768

Erythrocytes, endocrinologic control, pregnancy, R720

Esophagus, sodium transport, active (flounder), R888

Estriol, uterine blood flow and, early pregnancy (sheep), R850

Estrogen, blood volume, cardiac output and, maternal, during pregnancy, R720

Estrone, uterine blood flow and, early pregnancy (sheep), R850

Estrous cycle, uterine blood flow and, early pregnancy (sheep), R850

Exercise  
aversive conditioning  
renal excretory function, neural control of, R251

renal excretory response and, awake state, R259  
bicycle, slow and fast muscle fibers in, R25

catecholamine secretion, ganglionic blockade effects (dogfish), R915  
electrolytes, slow and fast muscle fibers, R25

glucose uptake after, carbohydrate feeding effects, muscle, R684  
glycogenolysis during, liver, R353  
swimming, lipoprotein lipase activity and lipolysis after, obesity effects, R706

training, cardiorespiratory function and (horse), R160  
wheel-running, clorgyline effects (hamster), R215

**F**

Fat, metabolism, migration and cold (bird), R755

Fatty acids, triglycerides, turnover, experimental model, R386

Febrile response, age-related deficits, R379  
Feces, analysis, energy balance, intestinal bypass surgery, R658

Feedback, tubuloglomerular, angiotensin and, renal hemodynamic actions, R166

Feeding  
carbohydrate, glucose uptake and, muscle, exercise, R684  
duodenal osmoconcentration and, after ingestion of hypertonic nutrients (pig), R181  
energy balance and body weight regulation, intestinal bypass surgery, R658  
food amount, prefeeding corticosterone peak, R339

photoperiodic regulation of (meadow vole), R334  
satiety, short-term, gastric distension and (monkey), R174  
satiety agents, peptides, R927  
ventromedial hypothalamic obesity, guanethidine sympathectomy effects, R408

Fetus: *see also* Pregnancy  
maternal blood volume and cardiac output, endocrinologic control, R720

Fever  
deficits, age-related, R379  
induced, brain-abdomen temperature and, pregnancy, R421  
suppression, pregnancy and, R421

Fibronectin, plasma, endogenously labeled, kinetics of, R564

Filtration  
glomerular  
ammonia production and, renal (goldfish), R590  
angiotensin II effects (turtle), R837  
behavioral stress, angiotensin II effects, awake state, R259  
hepatic blood flow and, during diving (seal), R743  
neural control, awake state, R251  
rate, angiotensin and tubuloglomerular feedback interactions, R166

Flow, neuropsychobiological, from intermittency to transitivity in, R484

Fluid  
body, distribution, central nervous system regulation, R901  
hypotonic, isotonic, and hypertonic, lymph flow, thoracic duct, R785

Food intake: *see* Feeding  
Forearm, metabolism and blood flow, rest states, R110

Forebrain, stimulation, parabrachial unit response, R811

**G**

Ganglia, superior cervical, sympathectomy and hypothalamic obesity, R408  
**Ganglionic blockade:** *see Blockade*  
 Gas, exchange, countercurrent capillary, R534  
 Gastric distension, short-term satiety and (monkey), R174  
 Gastric emptying, short-term satiety, gastric distension and (monkey), R174  
 Gastroduodenal disease, stress-induced, luminal acidity and, R230  
 Genetics, variation, stress and, noradrenergic system, R600  
 Glomerular filtration: *see Filtration*  
 Glucagon  
 liver, during exercise, R353  
 repletion, muscle, carbohydrate effects, after exercise, R684  
 Gluconeogenesis, spawning migration, liver (salmon), R827  
 Glucose  
 blood, liver, exercise and, R353  
 hyperinsulinemia, hypothalamic obesity and, R372  
 hypertonic, feeding and duodenal osmotic concentration after (pig), R181  
 metabolism, hyperglycemia and hypoglycemia, fetus (lamb), R730  
 tolerance, spontaneous obesity and weight loss (dormice), R396, R403  
 turnover, non-steady state, model, R624  
 uptake, carbohydrate feeding effects, muscle, exercise, R684  
 Glutamine, ammoniagenesis and, renal (dogfish), R581  
 Glycogen  
 liver, exercise and, R353  
 reserves, migration and cold (bird), R755  
 Glycogenolysis, liver, during exercise, R353  
 Guanethidine, sympathectomy, ventromedial hypothalamic obesity and, R408

**H**

Heart  
 multisegmental spinal sympathetic reflexes, R345  
 performance, voluntary apnea, R143  
 Heart rate  
 noxious radiant heat effects, anesthesia, R576  
 post-cough response, age, sex, and blood pressure effects, R18  
 Heart ventricles, left  
 contractility, training effects (horse), R160  
 receptor stimulation, plasma vasopressin, awake state, R792  
 Heat, radiant, noxious, cardiovascular responses in anesthesia, R576  
 Hedonism, sodium chloride preference, hypertensive, R38  
 Hemorrhage  
 autonomic regulation, whole-body lymph flow, R695  
 vasopressin, blood and cerebrospinal fluid, R541  
 Hepatocytes  
 intracellular pH, temperature interactions and, R32  
 metabolic organization, spawning migration (salmon), R827  
 Hexamethonium, whole-body lymph flow and, R695

Hindlimb, perfusion, carbohydrate feeding effects, muscle, after exercise, R684  
 Histidine, transport, atypical amino acid effects, brain, R556  
 Hormones, endogenous, uterine blood flow and, early pregnancy (sheep), R850  
 Hydralazine, renal function curve, DOCA-saline hypertension, R633  
 Hydrogen ions  
 secretion, insulin effects, urinary bladder (turtle), R69  
 ventilatory control, metabolic alkalosis, R873

Hypercapnia  
 acid-base balance, ionic balance and (salamander), R689  
 carotid chemoreceptors, chronic hypoxia, R678  
 cerebrospinal fluid transients, R701  
 ventilatory control, metabolic alkalosis, R873

Hyperglycemia, cerebral metabolism in, fetal (lamb), R730  
 Hyperinsulinemia, hypothalamic obesity and, autonomic drugs and glucose effects, R372

Hypernatremia, urinary excretion and, prostaglandin E<sub>2</sub>, R329  
 Hypertension  
 DOCA-saline, arterial pressure-urinary output relations, R633  
 genetic, sodium chloride preference in, R38  
 spontaneous, amygdaloid stimulation and, R281

Hyperthyroidism, neonatal, adult sympathetic stress responses and, R95

Hypertonic fluid: *see Fluid*  
 Hypoglycemia, cerebral metabolism in, fetal (lamb), R730

Hypothalamus  
 lesions, ingestive behavior and, R83  
 paraventricular nucleus of, parabrachial unit responses, R811  
 temperature, induced fever and, pregnancy, R421  
 temperature regulation (monkey), R293  
 ventromedial, lesions, guanethidine sympathetic effects, R408

Hypotonic fluid: *see Fluid*  
 Hypoxia  
 chronic, carotid chemoreceptors in, R678  
 diving, metabolic adjustments (lungfish), R651  
 ventilatory control, metabolic alkalosis, R873

**I**

Indoleamines, locomotor activity and (hamster), R215  
 Ingestive behavior: *see Behavior; see also Feeding*  
 Insulin  
 acidification and, urinary (turtle), R69  
 action, spontaneous obesity and weight loss (dormice), R396, R403  
 cellular mechanisms, shock and ischemia, R117  
 turnover, non-steady state, model, R624  
 Intermittency, neuropsychobiological flows, R484

Intestines  
 bypass surgery, energy balance and body weight regulation, R658  
 compliance: *see Compliance*

Ions  
 balance, pH and, hypercapnia (salamander), R689  
 extracellular, control of, during osmotic disturbances, brain (skate), R853  
 transport, urinary bladder (fish), R45  
 Ischemia, cellular mechanisms in, R117  
 Isoproterenol  
 hyperinsulinemia, hypothalamic obesity and, R372  
 ingestive behavior, anteroventral third cerebral ventricle lesions and, R83  
 Isotonic fluid: *see Fluid*

**J**

Journals in the eighties, R749

**K**

Kallynochrons, pharmacokinetic scaling, interspecies, R768

Ketone body, turnover, non-steady state, model, R624

Kidney  
 ammoniogenesis, acid excretion and (dogfish), R581  
 ammonia production, low environmental pH effects (goldfish), R590  
 angiotensin II effects (turtle), R837  
 blood flow: *see Blood flow*  
 denervated, excretory function, neural control of, R251  
 excretion, angiotensin II effects, behavioral stress, awake state, R259  
 excretory function, behavioral stress, awake state, R251  
 function, voluntary diving (seal), R743  
 function curve, DOCA-saline hypertension, R633

hemodynamics, angiotensin and tubuloglomerular feedback interactions, R166

Kidney tubules, reabsorption, neural control, awake state, R251

Kinetics: *see specific subject and site*

**L**

Lactate, generation, rest states, forearm, R110

Lateralization, function, R505

Lectins, mucous components (slug), R448

Light  
 circadian clock, sleep and, R497  
 exposure, naturalistic studies of, R613  
 intensity, circadian rhythm and (monkey), R800

pulses and cycles, circadian activity rhythm and, R10

Light-dark cycle, masking, circadian rhythms (monkey), R920

Limbic system, amygdaloid stimulation, spontaneous hypertension, R281

Linear function, relations, parameter estimation, model, R135

Lipids, photoperiodic regulation (meadow vole), R334

Lipogenesis, spontaneous obesity, weight loss and (dormice), R396, R403

Lipolysis, swim training and, obesity, R706  
 Lipopolysaccharide, endotoxic shock, liver, R737

Lipoprotein, turnover, experimental model, R386

Lipoprotein lipase, activity, swim training and, obesity, R706

Lithium, satiety and, R927

**Liver**

- adenylate cyclase activity, endotoxin shock effects, R737
- blood flow, voluntary diving (seal), R743
- glycogenolysis, exercise, R353
- lipoprotein turnover, experimental, R386
- metabolic organization, spawning migration and, (salmon), R827
- Locomotor activity, clorgyline effects (hamster), R215
- Locus ceruleus, genetic variation, stress and, R600
- Luteinizing hormone, secretion, regulation of, brain renin-angiotensin system, R805
- Lymph flow
  - thoracic duct, hypotonic, isotonic, and hypertonic fluid effects, R785
  - whole-body, autonomic nervous system and, R695
- Lysine, transport, atypical amino acid effects, brain, R556

**M**

Magnesium

- permeability: *see* Permeability
- slow and fast muscle fibers, rest and exercise, R25

Mass, body, photoperiodic regulation of (meadow vole), R334

Mathematics, physiology, R455

Medulla

- neural excitation, cardiac spinal afferent nerves, R241
- sympathetic neurons, sequence of activation, R438

Melatonin, photoperiodic regulation (meadow vole), R334

Metabolic adjustments, migration and cold (bird), R755

Metabolism

- blood flow and, rest states, forearm, R110
- diving and recovery and (lungfish), R651
- 3-Methylglucose, transport, carbohydrate effects, muscle, after exercise, R684

Microcirculation: *see also* Blood flow; Circulation

- countercurrent capillary exchange, model, R534
- Migration, spawning, metabolic organization of liver (salmon), R827
- Milk, intake, mechanism of control, sucking, R154
- Models
  - brain, neuropsychobiological flow, R484
  - calcium homeostasis, simulation of, R664
  - compartmental, bicarbonate kinetics, R190
  - countercurrent capillary exchange, R534
  - drug delivery, cerebrospinal fluid and brain tissue, R303
  - dynamic, physiology, R467
  - information, data and, R620
  - intracellular pH-temperature interactions, hepatocytes, R32
  - linear, abuse of statistical packages, R299
  - lipoprotein turnover, experimental, R386
  - mathematical
    - endocrine systems, R473
    - endogenously labeled plasma fibronectin, R564

**N**

Natriuresis, sodium balance, dehydration effects, species differences (rat, rabbit, sheep), R287

Naturalistic studies, light exposure, R613

Neonate, hyperthyroidism, adult sympathetic stress responses and, R95

Ne: *see also* specific nerve recording, upper airway stimulation with smoke, R433

Neural control, renal excretory function, behavioral stress, awake state, R251

Neural excitation, widespread, cardiac spinal afferent nerves, R241

Neurochemistry, brain, sex differences, interhemispheric coupling coefficients and, R151

Neurons, sympathetic: *see* Sympathetic neurons

Neuropsychobiological flow: *see* Flow

Nipple, shifting, milk intake control and, suckling, R154

Noradrenergic system, central and peripheral, genetic variation, stress and, R600

Norepinephrine

- brown fat receptors, winter-acclimatized (vole), R357
- neonatal hyperthyroidism, adult stress and, R95
- secretion, ganglionic blockade effects, exercise (dogfish), R915
- turnover, sympathetic activity and obesity relations, R364

Nutrients

- hypertonic, duodenal osmoconcentration and feeding after (pig), R181
- oxidation, <sup>13</sup>C-labeled bicarbonate, R190

**O**

Obesity

- diet-induced, sympathetic activity and, R364
- energy balance, intestinal bypass surgery, R658
- hypothalamic, hyperinsulinemia and, R372
- spontaneous, weight loss and (dormice), R396, R403
- swimming and, lipoprotein lipase activity and lipolysis after, R706
- ventromedial hypothalamic, guanethidine sympathectomy, R408

Open-loop gain, baroreflex, pulmocutaneous (toad), R642

Oscillation, mathematics for physiology, R455

Oscillography, spinal cord, R751

Osmoconcentration, duodenal, food intake and, after hypertonic nutrient ingestion (pig), R181

Osmolality

- plasma, daily sodium intake effects, R860
- urinary prostaglandin E<sub>2</sub> excretion, dehydration and, R329

Osmolarity, urinary, DOCA-saline hypertension, R633

Osmoregulation

- brain (skate), R853
- sodium transport, esophageal (flounder), R888
- urinary bladder (fish), R45
- vasopressin and, dehydration, thirst, and hemorrhage, R541

Osmotic disturbances, brain, control of extracellular ions (skate), R853

Ovariectomy, blood flow, uterine, during pregnancy (sheep), R843

Ovulation, angiotensin II effects, brain, R805

Oxygen

- consumption, rest states, forearm, R110
- uptake, training effects (horse), R160

**P**

Pacemaker, circadian, clorgyline effects (hamster), R215

Pain, noxious radiant heat, anesthesia, R576

Pancreatic afferents: *see* Afferents

Panting, thermoregulation, circadian and arousal state influences (pigeon), R321

Parabrachial unit, response, buffer nerve and forebrain stimulation, R811

Parameters, estimation, linear functional relations, R135

Parathyroid hormone, calcium homeostasis and, model, R664

Particle collision theory, platelet aggregation, R776

Pectoralis muscle, seasonal acclimation and (goldfinch), R265

Peptides: *see also* Polypeptides

- satiety effects, R927

Permeability

- capillary, drug delivery and, model, R303
- magnesium, esophagus (flounder), R888

pH

- environmental, low, ammonia and, renal (goldfish), R590
- gastric, stress-induced gastroduodenal disease, R230
- intracellular, temperature interactions and, hepatocytes, R32
- ionic balance and, hypercapnia (salmander), R689

Pharmacokinetics

- cerebrospinal fluid, brain tissue and, model, R303
- scaling, Dedrick plots and, interspecies, R768

Phentolamine, hyperinsulinemia, hypothalamic obesity and, R372

Photoinsensitivity, energy balance, reproduction and (meadow vole), R334

Photoperiodic regulation, energy balance, reproduction and (meadow vole), R334

Phrenic nerves, widespread neural excitation from, R241

**Physiology**  
 dynamic models for, R467  
 integrative, physical approach to, R510  
 mathematics for, R455  
 migratory, metabolic adjustments (bird), R755

**Plasma**  
 electrolytes: *see* Electrolytes  
 fibronectin: *see* Fibronectin  
 lipoprotein and apoprotein B turnover, experimental, R386  
 osmolality: *see* Osmolality  
 vasopressin: *see* Vasopressin  
 volume: *see* Volume

**Platelets**  
 aggregation, analysis of, particle collision theory, R776  
 function, regulation of, catecholamines, R100

Polyethylene glycol, ingestive behavior, anteroventral third cerebral ventricle lesions and, R83

Polypeptides: *see also* Peptides  
 pancreatic, satiety and, R927

Posteriori hypotheses, abuse of statistical packages, R299

**Potassium**  
 control, brain osmoregulation (sheep), R853  
 excretion, water deprivation effects, urinary, R329  
 slow and fast muscle fibers, rest and exercise, R25

**Potentials**  
 evoked, brain dynamics and physical causality, R510  
 field, retinal and cortical, visual acuity, R637

**Pregnancy: *see also* Fetus**  
 blood flow fluctuations, uterine (sheep), R843  
 early, uterine blood flow and endogenous hormones (sheep), R850  
 induced fever, brain-abdomen temperature during, R421  
 maternal blood volume, cardiac output and, R720

**Pressure: *see also* Blood pressure**  
 arterial, urinary output relations, hypertension, R633  
 central venous, vasopressin and angiotensin II and, R906  
 intravascular, vasopressin and angiotensin II and, R906

Priori hypothesis, abuse of statistical packages, R299

Progesterone, uterine blood flow and, early pregnancy (sheep), R850

Prolactin, ion transpot, control of, urinary bladder (fish), R45

Propranolol, hyperinsulinemia, hypothalamic obesity and, R372

Prostaglandin E<sub>1</sub>, brain-abdomen temperature, induced fever, pregnancy, R421

Prostaglandin E<sub>2</sub>, urinary excretion of, water deprivation effects, R329

Pulmocutaneous artery, baroreflex, open-loop analysis (toad), R642

Pulse-wave propagation, arterial system (diamond python), R831

Pyruvate dehydrogenase, seasonal acclimation, pectoralis muscle (goldfinch), R265

**R**

Radiation, low-dose, absolute threshold, R935

**Receptors**  
 $\beta$ -adrenergic, increased, brown fat, cold acclimation and (vole), R357  
 adrenoreceptors, catecholamines, regulation of platelet function, R100  
 airway, distribution and discharge properties (opossum), R209  
 baroreceptors  
   arterial, denervation, diving responses after (duck), R222  
   smoke-induced stimulation, R433  
 central sodium, differential sympathetic responses, R60  
 chemoreceptors  
   carotid, efferent inhibition of, chronic hypoxia, R678  
   carotid, ventilatory control in metabolic alkalosis, R873  
   smoke-induced stimulation, R433  
 left ventricular, stimulation effects, plasma vasopressin, awake state, R792

Rectal gland, elasmobranch, calcium in adenosine monophosphate, cyclic effects (dogfish), R894

**Reflexes**  
 baroreceptor, post-cough response, age effects, R18  
 baroreflex, pulmocutaneous, open-loop analysis (toad), R642  
 cardiovascular  
   pancreatic afferent stimulation and, R820  
   plasma vasopressin and, awake state, R792  
 somatosympathetic, noxious radiant heat, anesthesia, R576  
 spinal sympathetic, originating from heart, R345  
 sympathetic, smoke-induced, upper airway, R433  
 thermal effects, blood flow, tail, R426  
 vescicosympathetic, spinal, R311

Rehydration, sodium balance and, species differences (rat, rabbit, sheep), R287

**Renal nerve**  
 smoke-induced stimulation, reflexes, R433  
 sympathetic responses, angiotensin and sodium chloride, R60

Renin, receptor blockade, brain, sodium-deprived, awake state, R881

Renin-aldosterone system, body fluid compartments, preoptic recess lesions and, R901

**Renin-angiotensin system**  
 brain, luteinizing hormone secretion regulation, R805  
 urinary excretion, water deprivation effects, R329

Reproduction, photoperiodic regulation of (meadow vole), R334

Reproductive system, mathematical model, R473

Resistance, vascular, amygdaloid stimulation in spontaneous hypertension, R281

**Respiration**  
 fetal, hyperglycemia and hypoglycemia (lamb), R730  
 post-cough response, age effects, R18

Respiratory exchange ratio, training effects (horse), R160

Respiratory regulation  
 airway receptors and (opossum), R209  
 parabrachial unit responses, R811

Reticulendothelial system, cellular mechanisms, shock and ischemia, R117

Retina, response, pattern-evoked, visual acuity, R637

**Rhythms**  
 biological  
   light exposure, R613  
   periodic behavior vs. chaos, R478

circadian  
 food availability and prefeeding cortisol peak, R339  
 light-dark masking of (monkey), R920  
 phase-setting action of light, R10  
 sleep and, R497  
 temperature effects (monkey), R800  
 thermoregulation (pigeon), R321  
 spontaneous obesity, weight loss and (dormice), R396, R403

Ringer solution, lactated, whole-body lymph flow regulation, R695

**S**

**Salt**  
 appetite, genetic hypertension, R38  
 fluid balance and, dehydration, thirst, and hemorrhage, R541

Saralasin  
 central angiotensin II receptor blockade, sodium-deprived, awake state, R881  
 renal excretory response, behavioral stress, awake state, R259

Satiety: *see* Feeding

Seasonal acclimation, pectoralis muscle and (goldfinch), R265

Self-organization, temporal, biochemical systems, R478

Sex differences  
 brain neurochemistry, interhemispheric coupling coefficients and, R151  
 heart rate response, post-cough, R18

Shivering, thermoregulation, circadian and arousal state influences (pigeon), R321

**Shock**  
 cellular mechanisms in, R117  
 endotoxic, adenylate cyclase activity and, liver, R737

Shunt, arteriovenous, maternal blood volume control, pregnancy, R720

Sinus nerve, efferent, carotid body chemoreception, chronic hypoxia, R678

Skin  
 forearm, blood flow during rest, R110  
 sodium ion transport, regulation of (frog), R272

**Sleep**  
 circadian clock and, R497  
 light exposure and, R613  
 REM, thermoregulation and (pigeon), R321

Smoke, upper airway stimulation, sympathetic outflow during, R433

**Sodium**  
 active transport, esophageal (flounder), R888  
 balance, hypertension, R38  
 control of, brain osmoregulation (sheep), R853  
 depletion, dehydration effects, species

differences (rat, rabbit, sheep), R287  
deprivation, central angiotensin II receptor blockade, awake state, R881  
excretion  
    behavioral stress, angiotensin II effects, awake state, R259  
    central nervous system distribution, R901  
    neural control of, awake state, R251  
    urinary, DOCA-saline hypertension, R633  
    water deprivation effects, urinary, R329  
intake, daily, vasopressin secretion and drinking and, R860  
secretion, adenosine monophosphate, cyclic effects, rectal gland (dogfish), R894  
slow and fast muscle fibers, rest and exercise, R25  
transport, control of, urinary bladder (fish), R45  
Sodium-calcium exchange, urinary bladder, colon and (toad), R91  
Sodium chloride  
    cotransport, adenosine monophosphate, cyclic effects, rectal gland (dogfish), R894  
    preference, hypertension, R38  
    sympathetic responses to, R60  
Sodium ions, transport, regulation, skin (frog), R272  
Somatomammotropin, chorionic, blood volume control, maternal, during pregnancy, R720  
Species differences  
    pharmacokinetic scaling, Dedrick plots, R768  
    sodium depletion, dehydration effects (rat, rabbit, sheep), R287  
Spinal afferents: *see* Afferents  
Spinal cord, electrophysiology, R751  
Splenic nerve, sympathetic responses, angiotensin and sodium chloride, R60  
Statistics  
    abuse of, linear models, R299  
    information content, data, models, R620  
Steady-state, multiple kinetic, sodium ion transport, skin (frog), R272  
Stimulus-secretion coupling: *see* Coupling  
Stress  
    behavioral  
        angiotensin and renal excretion, awake state, R259  
        renal excretory function, awake state, R251  
    genetic variation and, noradrenergic system, R600  
    sympathetic response to, adult, neonatal hyperthyroidism and, R95  
Substrates, oxidation, spawning migration, liver (salmon), R827  
Suckling, milk intake, mechanism of control, R154  
Sweat gland, eccrine, structure and function, R203  
Sweat rate, excess calcium and (monkey), R76  
Swimming: *see* Exercise  
Sympathectomy, guanethidine, ventromedial hypothalamic obesity and, R408  
Sympathetic activity, relations, diet-induced obesity, R364  
Sympathetic nerves  
    basal discharge, sequence of activation,

    R438  
    cardiac afferent, widespread neural excitation from, R241  
    cardiac efferent, widespread neural excitation from, R241  
Sympathetic nervous system, peripheral, genetic variation and stress effects, R600  
Sympathetic neurons  
    cardiac afferent, spinal reflexes, R345  
    thoracic, responses, urinary bladder afferents, R311  
    ventrolateral and dorsal medullary, sequence of activation, R438  
Sympathetic outflow, differential pattern of, upper airway stimulation with smoke, R433  
Sympathetic response  
    differential, angiotensin and sodium chloride, R60  
    stress, adult, neonatal hyperthyroidism effects, R95

## T

Temperature  
    circadian, light-dark masking of (monkey), R920  
    circadian clock, sleep and, R497  
    circadian rhythm and (monkey), R800  
    environmental, low pH, ammonia production and, kidney (goldfish), R590  
    intracellular pH interactions, hepatocytes, R32

Temperature, body

    brain, selective regulation (monkey), R293  
    brain and deep abdominal, during induced fever, pregnancy, R421  
    control, blood flow, tail, R426

Thermodynamics, network, theoretical and experimental biology, R1

Thermogenesis

    muscular, migration and cold (bird), R755  
    shivering, pectoralis muscle and (goldfinch), R265

Thermoregulation

    blood flow, tail, R426  
    circadian and arousal state influences (pigeon), R321  
    excess calcium and (monkey), R76

Thermosensitivity, spinal, circadian and arousal state influences (pigeon), R321

Thirst: *see* Drinking

Thoracic duct, lymph flow, hypotonic, isotonic, and hypertonic fluid effects, R785

Thromboxane A<sub>2</sub>, platelet function regulation, R100

Thyroxine, neonatal hyperthyroidism, adult stress and, R95

Tissue: *see also* specific type and site metabolism and blood flow, rest states, R110

    plasma fibronectin, endogenously labeled, R564

Tracer

    kinetics, plasma fibronectin, incorporation into tissue, R564  
    radioactive, non-steady state turnover, model, R624

Training: *see* Exercise

Transcendental meditation, blood flow and

metabolism during, forearm, R110  
Transitivity, neuropsychobiological flows, R484  
Triglycerides, turnover, experimental model, R386  
Tubuloglomerular feedback: *see* Feedback

## U

Ulcers, stress, luminal acidity and, R230  
Urea, osmoregulation, brain (sheep), R853  
Urinary bladder

    acidification, insulin stimulation of (turkey), R69

    affersents, upper thoracic sympathetic

    neuron responses, R311

    colon and, calcium transport (toad), R91

    contractility constant, R673

    ion transport, control of (fish), R45

    Urinary excretion, prostaglandin E<sub>2</sub>, water deprivation effects, R329

    Urinary output, arterial pressure relations, hypertension, R633

Urine

    behavioral stress, angiotensin II effects, awake state, R259

    neural control of, awake state, R251

Uterus

    blood flow: *see* Blood flow

    temperature, induced fever, pregnancy, R421

## V

Vagus nerve

    airway receptors and (opossum), R209  
    sympathetic, hyperinsulinemia, autonomic drug and glucose effects, R372

Valine, transport, atypical amino acid effects, brain, R556

Vascular mixing, countercurrent capillary exchange, model, R534

Vascular resistance: *see* Resistance

Vasopressin

    arginine, antagonist action, R713

    blood and third ventricle cerebrospinal fluid, dehydration, thirst, and hemorrhage, R541

    plasma, left ventricular receptor stimulation effects, awake state, R792

    pressor effects, R906

    secretion, daily sodium intake effects, R860

Velocity

    maximum contractile element, urinary bladder, R673

    wave, arterial system (diamond python), R831

Velocity spectrum, afferent fiber, acupuncture and, R606

Ventilatory control, metabolic alkalosis, R873

Ventricles: *see* Cerebral ventricles; Heart ventricles

Veratrine, plasma vasopressin and, awake state, R792

Visual acuity, retinal and cortical field potentials, pattern stimulation, R637

Volume

    brain, control during osmotic disturbances (skate), R853

    plasma

    central nervous system regulation, R901

Volume (*continued*)  
control, pregnancy, R720  
Volume control, milk intake, suckling,  
R154

## W

Water  
balance, daily sodium intake effects,  
R860

## SUBJECT INDEX TO VOLUME 14

brain, osmoregulation (skate), R853  
deprivation  
sodium balance and, species differences (rat, rabbit, sheep), R287  
urinary excretion of prostaglandin E<sub>2</sub>,  
R329  
excretion, antagonist-to-antidiuretic action of arginine vasopressin, R713  
flux, esophagus, sodium transport (flounder), R888

transcellular, shifts, thoracic duct lymph flow, R785  
Weight  
body  
loss, spontaneous obesity and (dormice), R396, R403  
regulation, intestinal bypass surgery, R658  
Wheel-running: *see* Exercise

No. 1. JULY 1983

## INVITED OPINION

Network thermodynamics: a candidate for a common language for theoretical and experimental biology

D. C. Mikulecky

R1

---

Phase-resetting action of light on the circadian activity rhythm of <i>Rattus exulans</i> P. H. Gander and R. D. Lewis	R10
Post-cough heart rate response: influence of age, sex, and basal blood pressure J. Y. Wei, J. W. Rowe, A. D. Kestenbaum, and S. Ben-Haim	R18
Electrolytes in slow and fast muscle fibers of humans at rest and with dynamic exercise G. Sjøgaard	R25
Intracellular pH-temperature interactions of hepatocytes from American eels P. J. Walsh and T. W. Moon	R32
Sodium chloride preference of genetically hypertensive and normotensive rats R. Di Nicolantonio, F. A. O. Mendelsohn, and J. S. Hutchinson	R38
Control of ion transport by <i>Gillichthys mirabilis</i> urinary bladder C. A. Loretz and H. A. Bern	R45
Integral as well as proportional adrenal responses to ACTH M. E. Keller-Wood, J. Shinsako, and M. F. Dallman	R53
Differential sympathetic responses initiated by angiotensin and sodium chloride J. C. Tobey, H. K. Fry, C. S. Mizejewski, G. D. Fink, and L. C. Weaver	R60
Stimulation of urinary acidification by insulin in the turtle bladder J. A. L. Arruda	R69
Thermoregulatory responses to central injections of excess calcium in monkeys C. V. Gisolfi, P. T. Wall, and W. R. Mitchell	R76
A further characterization of the effects of AV3V lesions on ingestive behavior R. W. Lind and A. K. Johnson	R83
Active transport of calcium across the urinary bladder and colon of the toad <i>Bufo marinus</i> C. J. Rosoff, G. F. Baldwin, and P. J. Bentley	R91
Neonatal hyperthyroidism: effects on sympathetic responses to stress in adult rats R. McCarty, R. F. Kirby, and P. C. Brunjes	R95
Regulation of canine platelet function. II. Catecholamines K. M. Meyers, L. Y. Huston, and R. M. Clemons	R100
Forearm blood flow and metabolism during stylized and unstylized states of decreased activation R. Jevning, A. F. Wilson, J. P. O'Halloran, and R. N. Walsh	R110

No. 2. AUGUST 1983

## INVITED OPINION

Cellular mechanisms in shock and ischemia and their correction  
I. H. Chaudry

R117

---

## MODELING METHODOLOGY FORUM

Parameter estimation in linear functional relationships  
E. M. Haacke and M. D. Goldman

R135

---

Cardiovascular functions during voluntary apnea in dogs <i>Y. C. Lin, E. L. Carlson, E. P. McCutcheon, and H. Sandler</i>	R143
Interhemispheric coupling coefficients: sex differences in brain neurochemistry <i>V. H. Denenberg and G. D. Rosen</i>	R151
Mechanisms of control of milk intake in suckling rats <i>C. P. Cramer and E. M. Blass</i>	R154
Effects of training on cardiorespiratory function in the horse <i>D. P. Thomas, G. F. Fregin, N. H. Gerber, and N. B. Ailes</i>	R160
Renal hemodynamic actions of angiotensin II: interaction with tubuloglomerular feedback <i>J. E. Hall and J. P. Granger</i>	R166
Gastric distension and short-term satiety in the rhesus monkey <i>J. B. Wirth and P. R. McHugh</i>	R174
Duodenal osmoconcentration and food intake in pigs after ingestion of hypertonic nutrients <i>T. R. Houpt, K. A. Houpt, and A. A. Swan</i>	R181
[ <sup>13</sup> C]bicarbonate kinetics in humans: intra- vs. interindividual variations <i>C. S. Irving, W. W. Wong, R. J. Shulman, E. O. Smith, and P. D. Klein</i>	R190
Individual variations in structure and function of human eccrine sweat gland <i>K. Sato and F. Sato</i>	R203
Distribution and discharge properties of airway receptors in the opossum, <i>Didelphis marsupialis</i> <i>J. P. Farber, J. T. Fisher, and G. Sant'Ambrogio</i>	R209
Effect of clorgyline (a MAO type A inhibitor) on locomotor activity in the Syrian hamster <i>L. Tamarkin, C. J. Craig, N. A. Garrick, and T. A. Wehr</i>	R215
Diving responses in ducks after acute barodenervation <i>D. R. Jones, W. K. Milsom, F. M. Smith, N. H. West, and O. S. Bamford</i>	R222
Role of luminal acidity in the pathogenesis of stress-induced gastroduodenal disease <i>B. H. Natelson and W. N. Tapp</i>	R230
Widespread neural excitation initiated from cardiac spinal afferent nerves <i>L. C. Weaver, R. L. Meckler, H. K. Fry, and S. Donoghue</i>	R241
Neural control of renal excretory function during behavioral stress in conscious dogs <i>J. P. Koepke, K. C. Light, and P. A. Obrist</i>	R251
Angiotensin II in the renal excretory response to behavioral stress in conscious dogs <i>J. P. Koepke and P. A. Obrist</i>	R259
Seasonal acclimatization in American goldfinches: the role of the pectoralis muscle <i>M. E. Yacoe and W. R. Dawson</i>	R265
Regulatory aspects of Na <sup>+</sup> transport in complex epithelia (frog skin) <i>E. G. Huf and D. C. Mikulecky</i>	R272
Hemodynamic responses to amygdaloid stimulation in spontaneously hypertensive rats <i>T. M. Galeno and M. J. Brody</i>	R281
Dehydration induces sodium depletion in rats, rabbits, and sheep <i>M. J. McKinley, D. A. Denton, J. F. Nelson, and R. S. Weisinger</i>	R287

---

#### RAPID COMMUNICATIONS

Selective regulation of brain and body temperatures in the squirrel monkey <i>C. A. Fuller and M. A. Baker</i>	R293
